Bugs

Report at sertk118@gmail.com (Aros version only)

Features

- Plays 22 different mod formats, including:
 - MOD, S3M, XM, IT, 669, AMF,
 - AMS, DBM, DMF, DSM, FAR,MDL,
 - MED, MTM, OKT, PTM, STM, ULT,
 - UMX, MT2, PSM,
 - MID.
- plays timidity's GUS patch files (*.pat):
 - a multi sample pat file with n samples can be played with a Frere Jacques canon with n voices.
- plays all types of MIDI files (*.mid):
 - uses the timidity .pat files for samples (when available)
 - recognizes environment variables:
 - MMPAT_PATH_TO_CFG set to the directory where the file "timidity.cfg" and the subdirectory "instruments" can be found,
 - default: "timidity:".
 - MMMID_SPEED for experimenting with the mod speed (1 thru 9)
 - MMMID_VERBOSE for feedback on the conversion process
 - MMMID_DEBUG for sake of completeness, only useful for maintainers
- plays textfiles written in the ABC music notation (*.abc):
 - uses the timidity .pat files for samples (when available)

recognizes environment variables:

MMPAT_PATH_TO_CFG set to the directory where the file "timidity.cfg" and the subdirectory "instruments" can be found,
default: "timidity:"
