

# LIQUID MENU PRO V 1.0

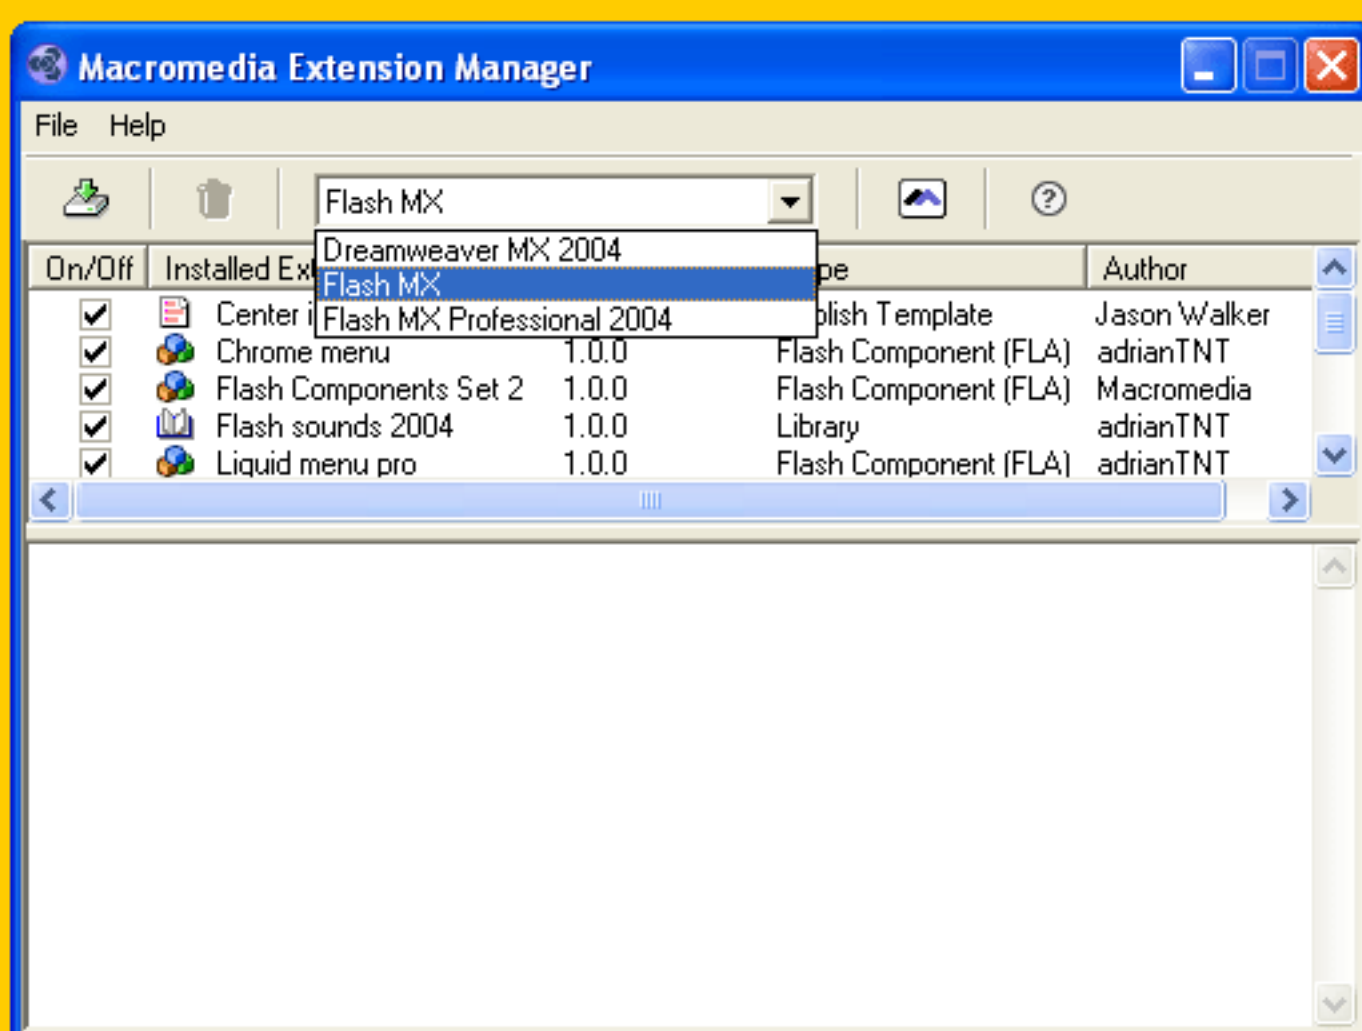

## Description.

Liquid menu pro is a menu component for Macromedia Flash. It is easy to configure by it's custom user interface, has options like:

- select number of buttons
- set the buttons text, link to open and target frame
- select the menu color
- set the roll over sounds on/off
- set the click sounds on/off
- set a text to be displayed in the top of the menu.

## How to install Liquid menu pro.

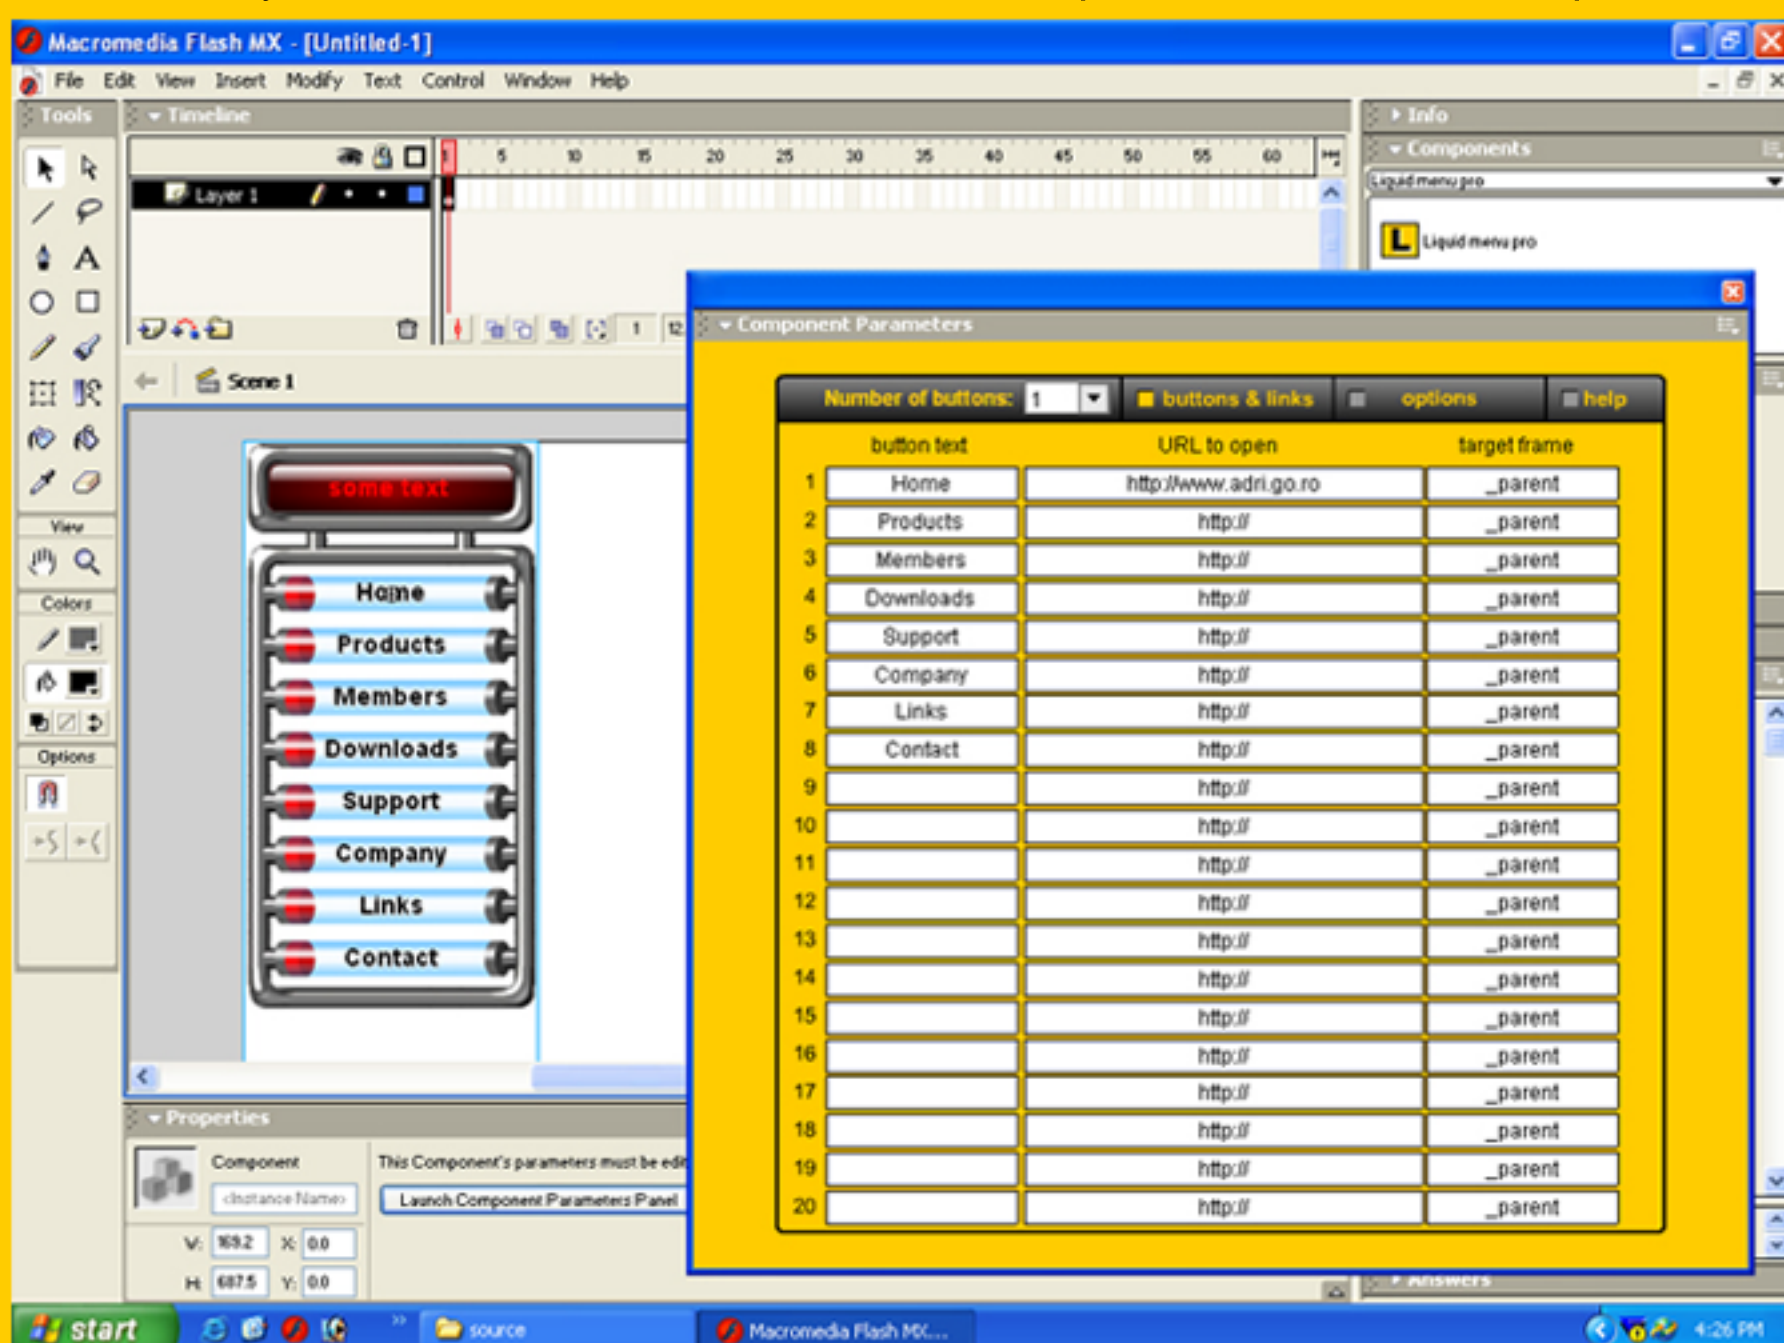

The file is distributed in the standard macromedia extensions file type (\*.mxp). To install a mxp file you need "Macromedia Extension Manger" that usually comes with flash and it's free to download from <http://www.macromedia.com> Open Extension Manager and select the Flash version that you want to use "Liquid menu pro" with, you can chose flash version from the drop down box.

Then click: "File>install Extension..." browse to the directory where you have saved the file "Liquid\_menu\_pro.mxp" and click "install", now fallow the instructions on screen.

## How to configure Liquid menu pro.

Open Macromedia Flash, select: "Window>Components" from the components panel select "Liquid menu pro", drag and drop it in your flash stage, now select "Window>Component Parameters" you will see the configuration window of the menu, enlarge the window so that you can see it all, enter the values that you want for the buttons text, URL to open and set the other options.
