Abstract

This bibliography records publications of Aaron Harwood.

Title word cross-reference

Υ [HS98a].

Basis [HS98a].

Class [HS98a]. **Cost** [HS98b].

Electrical [HS97]. **Expanded** [HS98a].

Fat [HS98c]. **Fat-tree** [HS98c].
Fundamental [HS97].

Highly [HS98b]. **Hybrid** [HS98c].

Interconnection [HS98a].

Low [HS98b].

Network [HS98b]. **Networks** [HS98a].

Quantum [HS97].

Scalable [HS98b]. **Scheduling** [HS97].

Theory [HS97]. **Time** [HS97]. **tree** [HS98c].

Uniprocessor [HS97]. **Using** [HS97].

Varying [HS97].

References

Harwood:1997:UFE

[HS97] Aaron Harwood and Hong Shen. Using fundamental electrical theory for varying time quantum uniprocessor scheduling. In *Region Ten Conference of the IEEE Speech and Image Technologies for Computing and Telecommunications*. Griffith University, School of Computers and Information Technology and School of Mi-

Microelectronic Engineering, Brisbane, Australia, 1997.

Harwood:1998:CIN

- [HS98a] Aaron Harwood and Hong Shen. A class of interconnection networks on the basis of expanded Υ networks. In *Proceedings of International Conference on Parallel and Distributed Processing and Applications*. Griffith University, School of Computers and Information Technology and School of Microelectronic Engineering, Brisbane, Australia, 1998.

Harwood:1998:HSL

- [HS98b] Aaron Harwood and Hong Shen. A highly scalable and low cost interconnection network. In *2nd International Conference on Parallel and Distributed Computing and Networks*. Griffith University, School of Computers and Information Technology and School of Microelectronic Engineering, Brisbane, Australia, 1998.

Harwood:1998:LCH

- [HS98c] Aaron Harwood and Hong Shen. A low cost hybrid fat-tree interconnection network. In *Proceedings of International Conference on Parallel and Distributed Processing and Applications*. Griffith University, School of Computers and Information Technology and School of Microelectronic Engineering, Brisbane, Australia, 1998.
