

The ThoJa Alarm Suite - Be informed about your Systems at all Times

"Errors wouldn't be that much expensive with due informed staff members"

Now

Tuesday 09:14 PM : The main document server in your company crashes. The power supply is broken! Wednesday morning at 09:07 AM one of your employees wants to have access to his documents on the broken server. At 9:15 the hardware service will be informed. With some luck your system is up again two hours later. As a result some of your employees couldn't work for over 2 hours and you didn't have access to important information.

with ThoJa Alarm Suite

Tuesday 09:14 PM : The main document server in your company crashes. The power supply is broken! At 09:20 PM the ThoJa Alarm Suite discovers the error (no reply on ping). At 9:25 PM the ThoJa Alarm Suite notifies the stand by hardware service. The hardware service takes care about the broken server and the system is back up again in the morning. Wednesday morning at 09:07 AM one of your employees wants to have access to his documents on the server. Everything works like usual.
