Quit.

Nicor is a smoking-cessation treatment. It fulfills your body's craving for nicotine while simultaneously reducing that craving. Over time, your addiction to nicotine will be broken.

Nicor is administered intravenously ^{DURING} over a period of thirty minutes. Three such treatments, with two weeks between each treatment, are required for Nicor to be effective.

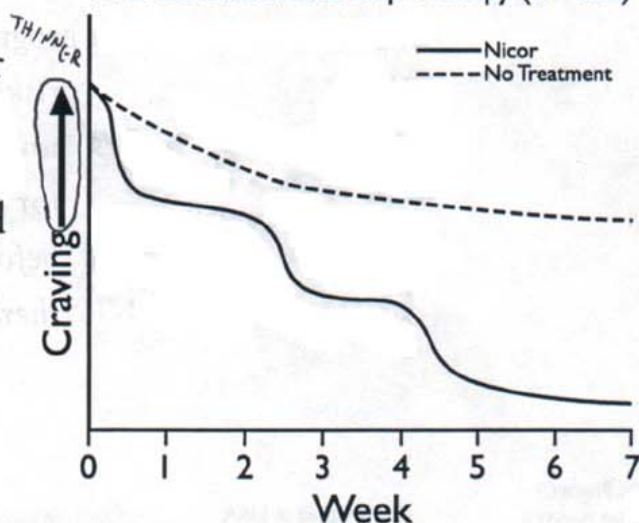

For Life.

Properly administered, Nicor can reduce your craving for cigarettes. Nicor therapy has been shown to be five times as effective as quitting ^{REPHRASE} "cold turkey" and three times as effective as the nicotine patch.
