v1.0

**L^AT_EX support files for Softmaker
Alte Schwabacher available at
<http://www.freefont.de>**

August 22, 2010

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker Alte Schwabacher font available at www.freefont.de in May 2009.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

I Alte Schwabacher (May 2009)

I.1 Package options

The font style file offers the following options:

I.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

I.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where 1.0 means 100%.

I.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from [Softmaker](#). Copy the Postscript Type1 font `AlteSchwabacher.pfb` to your local `TEX` tree:

```
TEXMF:/fonts/type1/softmakerfreefont/AlteSchwabacher/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
óaf	m	n	Alte Schwabacher	OTI, TI, TSI
óaf	m	fl	Alte Schwabacher	OTI, TI, TSI
óaf	m	fc	Alte Schwabacher	OTI, TI, TSI

I.3 Installation

The following steps will show you the installation in the case of `MiKTeX`. For another `TEX` distribution please take a look in its documentation.

- get `alteschwabacher.tds.zip`
- extract it in the main directory of your local `TEX` tree
- update the `fileNameDataBase (FNDB)` in `MiKTeX Settings` or with `initexmf -u1` on the command line
- include the map file
 - run `initexmf --edit-config-file updmap`
 - add `Map alteschwabacher.map` in the opening editor

¹for system-wide installations you have to add the `--admin` switch

- save the file and close the editor
- run `initexmf --mkmaps`

1.4 Usage

If you want to typeset your complete document with the font Alte Schwabacher simply add `\usepackage{alteschwabacher}` to your preamble. If not, simply add another font package after `\usepackage{alteschwabacher}`. You can switch to the font Alte Schwabacher with the command `\FFAlteSchwabacher`, which is a shortcut for:

```
\fontfamily{6as}\fontseries{m}\fontshape{n}\selectfont
```

This font offers the following additional ligatures in **TI** encoding: **ch** (<), **cf** (>), **ft** (|), **tz** (})
