

# **IconFind Categorize 1.0**

## **Overview**

This initial version of IconFind Categorize is meant to provide a simple but effective tool for the categorization of web pages and sites for the Internet as well as for intranets and other digital material. Future versions will have substantial enhancements including a fully interactive interface for categorization. We encourage all comments and input.

## **Download and Use**

IconFind Categorize 1.0 is ready to use upon downloading and does not need any further installation process. The IconFind Categorize 1.0 folder contains the Categorization\_Tool (html file), an IICS Manual (pdf file) and this Readme document (pdf file).

To begin categorizing your pages to the International Internet Categorization System (IICS) simply double-click on the Categorization\_Tool icon. If you need any help use the online links provided or consult the IICS Manual.

## **System Requirements**

IconFind Categorize 1.0 will run on virtually all platforms including Windows 95, 98, 2000, ME, XP and Mac OS 7.5.3 and higher. Speed and memory requirements are minimal and should not be a factor.

IconFind Categorize 1.0 can be used without payment for the categorization of web pages, sites and other digital material. However, IconFind, Inc. reserves all rights governing its use and distribution. The technology and methods of IconFind Categorize 1.0 are patent pending and/or protected by copyright.
